

## November 2013 CVCA Minutes

Date: 14-10-2013

Time: 12:30pm

Location: Hallie Chiropractic

Meeting Presenter: None

Attendance: Arkowski, Nanstad, Schultz

### MEETING CONTENT

Science moment was presented by Dr. Lisa Arkowski. She came across a recent science article that talked about how scientists have discovered a new ligament in the knee which they are referring to as the Anterior lateral ligament. <http://blog.sfgate.com/techchron/2013/11/08/anterolateral-ligament-internet-information/>

Even though this ligament was previously "discovered" it is now being brought to light that it appears in 97% of humans and may play a larger role in knee stability than originally thought.

Dr. Kevin Schultz notes; "The point to this science moment was what I believe and LOVE: If scientists are just now understanding a new ligament in the knee, imagine the trillions of things taking place at a cellular level that we do not understand now nor likely will ever understand! GOD's creation is amazing!!!!"

The small, but amazing, group of Dr. Kevin, Dr. Lisa and Dr. Dave took to the job of finalizing the CVCA's new mission statement. They started with the first rough draft formulated during October's CVCA meeting and molded it into our brand new mission statement...

#### Chippewa Valley Chiropractic Mission

To be a community of chiropractors with diverse philosophies and practices, united by our common goal of enriching the health and lives of individuals and families in the Chippewa Valley.

Big news for next meeting is – NO CVCA MEETING IN DECEMBER 2013!!!!

Therefore, next meeting is Thursday January 9<sup>th</sup>, 12:30 at Hallie Chiropractic.

If you have any ideas for meeting content, presenters, agenda, etc for January and beyond... speak up!!!

Any volunteer for Sci/Art/Philo in January? Let me know!

That's all for now!

Dr. Melissa Stangl

CVCA Secretary
